<sup>1</sup>The Bachelor of Arts degree requires fourth-semester proficiency in a second language. Science: 2 Tier One and 1 Tier Two NATS (Natural Science) courses fulfill the science requirement. Upper division (300-400 level) units: 42 required. See Advisement Report (ADVIP) for details.

<sup>2</sup>These courses are recommended for most math majors. Other courses that can be used are: CSC 120 or 250, MIS 301, NSCS 311, or PHYS 305. These latter courses may have additional eligibility criteria. <sup>3</sup>MATH 313 replaced MATH 215 as of fall semester 2015. Students who completed MATH 215 prior to fall 2015 or who have transfer credit equivalent to MATH 215 will still fulfill this requirement, though they will not earn upper-division credit for the course. <sup>4</sup>All emphases except Education require a minor; the Applied, Comprehensive, and Probability & Statistics emphases allow a minor in any subject. The minor should be selected in consultation with faculty advisor. Double-dipping between the math major and the minor is NOT permitted. Double majors are not required to have a minor. If pursuing a double degree, consult with your major advisor regarding UA requirements. <sup>5</sup>The Computer Science emphasis requires a Computer Science minor. <sup>6</sup>The Economics/Business emphasis requires a minor related to Economics, Finance, or Business; see handbook for a list of options. <sup>7</sup>The Life Sciences emphasis requires a minor in a Life Sciences area. <sup>8</sup>This 400-level course is to be selected with approval from your math faculty advisor. See handbook for pre-approved list. At least 15 units of 400-level MATH course work are required for the major. <sup>9</sup>The pedagogy courses within the Mathematics Education emphasis replace the minor requirement. No additional minor is required. <sup>10</sup>A variety of courses can be used to complete the numerical analysis sequence. Consult your advisor for details.
