UTA Program for Math and Stats Majors

The UTA program provides undergraduate math or stats majors with the opportunity to learn about teaching mathematics by working with an instructor of an undergraduate course and meeting regularly as a group with other UTAs and the UTA coordinators. Duties include participating in the weekly UTA seminar, running review sessions, possible classroom demonstrations, holding office hours, some grading, and two hours a week of tutoring.

UTAs earn 1 unit of upper-division elective credit for the UTA seminar, and are also paid.
