If you want to prepare for medical school or graduate studies in biology or health-related fields, consider this degree. A strong foundation in mathematics is integral to all scientific fields. Students earning this Bachelor of Science or Bachelor of Arts in Mathematics with a Life Sciences emphasis choose a minor or an additional major in a life science field. This dual immersion enables students to apply mathematical concepts to their studies in biological sciences. Undergraduates develop diversified knowledge and skills required for environmental fieldwork, scientific research or graduate/professional studies in medicine. They go on to find solutions and effect change in disease management and prevention and ecosystem and planetary health.

**LEARNING OUTCOMES**
- Apply computational methods; Math majors should be able to apply computational methods and mathematical concepts to analyze scientific problems.
- Apply mathematical models to current problems; Math majors should be able to critically evaluate and extend selected mathematical models in the current scientific literature.
- Create valid proofs; Students should be able to identify an appropriate proof strategy and almost always able to create a correct proof using multiple strategies as appropriate.
- Define Terms Precisely; Precision is essential in mathematics, and a crucial skill for math majors is to learn to define mathematical terms precisely.
- Effective communication of results; Math majors should be able to effectively communicate results to non-specialized audiences in written and verbal form.
- Recognize valid arguments; Logical rigor is a critical component of mathematical argumentation. We expect math majors to develop the ability to recognize when arguments are valid, and identify logical gaps and flaws.

**Undergraduate Graduation Requirements**
All course work and requirements for this degree must be completed prior to the date the degree is awarded. The University of Arizona requirements to follow in this audit are required for graduation and awarding of the degree.

3. Students must remain currently informed about all policies & other info that bears on completing a degree.

Required Units:
Additional units will be required to complete this degree if a student:
A) is admitted to the UA with deficiencies;
B) changes their academic plan(s);
C) fails to meet minimum course/plan requirements;
D) ineffectively plans or fails to execute a course of study that leads directly to degree completion; or
E) Candidates for a second bachelor's degree at The University of Arizona with a different award date than the first must earn no fewer than 30 units of University Credit in addition to the units required for the first degree, and must meet all requirements for the second degree.

The following requirements must be met for graduation.

**Units Required and Cumulative GPA**
120 units are required at a 2.0 GPA. View the pdf report grid for units earned toward this degree and cumulative GPA.

Completing a second bachelor's degree at The University of Arizona requires no fewer than 30 units in addition to the units required for the first degree, and all requirements for the second degree must be met.
