Fall 2003

You explain things very thoroughly, excellent method! Your enthusiasm is a great addition for a math class. You are truly a stellar math instructor, I have NO complaints! 😊

Fall 2003

I believe Bryden was an excellent teacher. He was always in a good mood and when people were a little slow to respond (Mondays) he livened things up. Bryden was very clear and understandable and if he wasn't we could have him explain further. I find to myself lucky to have had Bryden as an instructor.

Fall 2003

Bryden was a great instructor. He always came to class enthusiastic & prepared & seemed to really care that we all understood the material. He explains concepts very well, so that it doesn't seem challenging to learn. He also believes in every single one of his students!

Fall 2003

Bryden was a wonderful GSI. I would highly recommend him as a teacher... he understood the material and could teach it to us. He was also concerned that we learned the material... it was great!

Fall 2003

The pace of the class was faster than I would have liked but it left time for review. You did a good job teaching but I think you would do better teaching an honors math course

**Fall 2003**

It was nice to come to class and find a teacher who was passionate about the subject. Your willingness to make sure everyone understands the topic is nice. Sometimes though the homework, going over it, took long because of the lack of people doing it. But over all I enjoyed the class.
