Instructor Policy - Section 20 (TR)

Math 129 - Calculus II
PSYCH 205 on TR 2:00 – 3:15 pm

Instructor and Contact Information
Robert Sims, S346 ENR2, (520) 626-1990, rsims@math.arizona.edu
Office Hours: Fridays from 10am – 11am.
Course Webpage: https://math129.math.arizona.edu
My Course Website: https://www.math.arizona.edu/~rsims/ma129/ma129.html
Course materials will be delivered digitally via D2L through the Inclusive Access program. The
course policies and the course calendar are also posted in D2L. D2L will also serve as our course
grade book. Please verify the accuracy of all homework, quiz, and exam scores in a timely
fashion. A computer grading program called WebAssign will be used throughout the course

Course Communications
It is the student’s responsibility to keep informed of any announcements, syllabus adjustments
or policy changes made during scheduled classes, by email, or through D2L and WebAssign. My
preferred mode of communication is via email, and I typically respond within 24 hours.

Course Materials
The course materials include the textbook (Calculus Single Variable; Sixth Edition by Hughes-
Hallett et al.; published by Wiley) and access to the online homework system (WebAssign).

Course materials are being delivered digitally via D2L through the Inclusive Access program.
Please access the material through D2L the first day of classes to make sure there are no issues
in the delivery, and if you are having a problem or question it can be addressed quickly.

You automatically have access to the course materials FREE through January 22, 2019. You
must take action (even if you have not accessed the materials) to opt-out if you do not wish to
pay for the materials, and choose to source the content independently. The deadline to opt-
out is 9:00pm MST, January 22, 2019. If you do not opt-out and choose to retain your
access, the cost of the digital course materials will appear on your October Bursars
account. Please refer to the Inclusive Access FAQs at
https://shop.arizona.edu/textbooks/Inclusive.asp for additional information.

Required Materials
A graphing calculator is a tool that will be used in this course. We recommend any model in the
TI-83 or TI-84 series. Models that can perform symbolic calculations (also known as CAS) are
NOT allowed on exams and quizzes. CAS models include (but are not limited to) the TI-89, TI
NSpire CAS and HP 50g. Students are not allowed to share calculators during exams and quizzes.

Absence and Class Participation Policy
Participating in the course and attending lectures and other course events are vital to the
learning process. As such, attendance is required at all lectures and discussion section meetings.
Absences may affect a student's final course grade. If you anticipate being absent, are
unexpectedly absent, or are unable to participate in class online activities, please contact me as soon as possible. To request a disability-related accommodation to this attendance policy, please contact the Disability Resource Center at (520) 621-3268 or drc-info@email.arizona.edu. If you are experiencing unexpected barriers to your success in your courses, the Dean of Students Office is a central support resource for all students and may be helpful. The Dean of Students Office is located in the Robert L. Nugent Building, room 100, or call 520-621-7057.

The UA’s policy concerning Class Attendance, Participation, and Administrative Drops is available at: http://catalog.arizona.edu/policy/class-attendance-participation-and-administrative-drop
The UA policy regarding absences for any sincerely held religious belief, observance or practice will be accommodated where reasonable, http://policy.arizona.edu/human-resources/religious-accommodation-policy.
Absences pre-approved by the UA Dean of Students (or Dean Designee) will be honored. See: https://deanofstudents.arizona.edu/absences

Classroom Behavior Policy
To foster a positive learning environment, students and instructors have a shared responsibility. We want a safe, welcoming, and inclusive environment where all of us feel comfortable with each other and where we can challenge ourselves to succeed. To that end, our focus is on the tasks at hand and not on extraneous activities (e.g., texting, chatting, reading a newspaper, making phone calls, web surfing, etc.).

Students are asked to refrain from disruptive conversations with people sitting around them during lecture. Students observed engaging in disruptive activity will be asked to cease this behavior. Those who continue to disrupt the class will be asked to leave lecture or discussion and may be reported to the Dean of Students.

UA Nondiscrimination and Anti-harassment Policy
The University is committed to creating and maintaining an environment free of discrimination; see http://policy.arizona.edu/human-resources/nondiscrimination-and-anti-harassment-policy

Our classroom is a place where everyone is encouraged to express well-formed opinions and their reasons for those opinions. We also want to create a tolerant and open environment where such opinions can be expressed without resorting to bullying or discrimination of others.

Accessibility and Accommodations
At the University of Arizona we strive to make learning experiences as accessible as possible. If you anticipate or experience barriers based on disability or pregnancy, please contact the Disability Resource Center (520-621-3268, https://drc.arizona.edu/) to establish reasonable accommodations.

Assignments and Examinations
**Homework:** (100 points) Homework will be submitted in two formats throughout the semester. A computer grading program called WebAssign will be used for problems assigned from the text. Hand-written homework showing all work with proper notation will also be submitted. These problems will come from the text and/or from a set of problems created by your instructor. Problems of both types will be assigned and turned in on a weekly basis. I will grade each of the written assignments out of 10 points: 5 for completeness (all work considered) and 5 for correctness (based on a few randomly selected problems). A final homework score based on 100 possible points will be assigned (50 points from the computer graded assignments and 50 points from the hand-written assignments). Your lowest two hand-written scores will be dropped when averaging. For this reason, in general, there is no make-up homework. However, in complex and unusual circumstances that
are beyond your control, make-ups may be given on a case-by-case basis. This will require providing a detailed account of the situation and supporting documents. Approval in these cases is at the sole discretion of the instructor and/or the dean of students. Written homework is due at the beginning of class, and a late homework earns a zero. (Missed work due to late registration will also be considered on an individual basis.) Homework is an essential component of the course, whether it is assigned for grading or not.

**In-Class Exams:** (400 points) Three in-class exams are tentatively scheduled for Tuesday, February 5th (100 points); Tuesday, March 19th (150 points); and Thursday, April 25th (150 points). All electronic devices must be turned off during all exams. In general, there will be no make-up exams in the course. However, in complex and unusual circumstances that are beyond your control, a make-up exam may be given on a case-by-case basis. This will require providing a detailed account of the situation and supporting documents. Approval in these cases is at the sole discretion of the instructor and/or the dean of students. According to university policy, no exams will be held on the week of April 29th.

**Final Examination**

(200 points) The final exam is a comprehensive common exam. It is scheduled for Monday, May 6th from 8:00 – 10:00 am (see the University’s Final Exam Schedule at http://www.registrar.arizona.edu/schedules/finals.htm). Additional information and a study guide can be found at https://math129.math.arizona.edu. The University’s Exam regulations will be strictly followed https://www.registrar.arizona.edu/courses/final-examination-regulations-and-information.

**Grading Scale and Policies**

Your final course grade will be determined by a percentage of the 700 total possible points in the course. Grades will be no lower than the following:

- **A:** 100-90%
- **B:** 89-80%
- **C:** 79-70%
- **D:** 69-60%
- **E:** 59-0%

Neither exam scores nor final grades will be curved. No extra credit or bonus points are offered in this course.

Note: A grade of C or better in Math 129 is a necessary prerequisite for Math 223 (Vector Calculus) and Math 254 (Differential Equations). Students who receive a D in Math 129 will receive credit for the course towards graduation requirements, and will be able to use their course for the general education math requirement, but will not be automatically qualified to register for Math 223 or 254.

**Requests for incomplete (I) or withdrawal (W)** must be made in accordance with University policies, which are available at http://catalog.arizona.edu/policy/grades-and-grading-system#incomplete and
You may drop the class without a W through January 22 using UAccess. The class will appear on your UAccess record, but will not appear on your transcript. You may withdraw with a W through March 26 using UAccess. The University allows withdrawals through April 9, but only with the Dean’s approval. Late withdraws are dealt with on a case by case basis, and requests for late withdraw without a valid reason may or may not be honored.

**Dispute of Grade Policy:** Any questions regarding the grading of any assignment, quiz, or exam need to be cleared up within one week after the graded item has been returned.

**Code of Academic Integrity**
Students are encouraged to share intellectual views and discuss freely the principles and applications of course materials. However, graded work/exercises must be the product of independent effort unless otherwise instructed. Students are expected to adhere to the UA Code of Academic Integrity as described in the UA General Catalog. See: [http://deanofstudents.arizona.edu/academic-integrity/students/academic-integrity](http://deanofstudents.arizona.edu/academic-integrity/students/academic-integrity).

The University Libraries have some excellent tips for avoiding plagiarism, available at [http://new.library.arizona.edu/research/citing/plagiarism](http://new.library.arizona.edu/research/citing/plagiarism).

*Selling class notes and/or other course materials to other students or to a third party for resale is not permitted without the instructor’s express written consent.* Violations to this and other course rules are subject to the Code of Academic Integrity and may result in course sanctions. Additionally, students who use D2L or UA e-mail to sell or buy these copyrighted materials are subject to Code of Conduct Violations for misuse of student e-mail addresses. This conduct may also constitute copyright infringement.
